**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Christopher et al. (6,900,845).

Regarding claim 1, Christopher discloses a multiple format video signal processor (Figure 2A) showing a compressed MPEG data source 2 and a SD video 4, which meet the first database as claimed, and a decoder 10, which meets the test data generator as claimed. It should be noted that the video signals 2 and 4 are produced from storage media, which is the same as the database as claimed. In addition, using the output signal generated by the decoder 10 is considered an intended use of the invention. Finally, the input video signals in Christopher are inherently user selectable.

Thus, test signal or video signal generated by the decoder 10 corresponds to the user's input selection.

Regarding claim 2, note external memory 20.

Regarding claim 12, see rejection above.

Regarding claim 13, the video signals in Christopher enable the decoder 10 to generate a scenario.

***Allowable Subject Matter***

3. Claims 3-11, 14-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Isnardi et al. (6,400,400) shows a test generator.

Richard, II (5,656,751) shows a testing jig
